

Paranormal Investigations  
Of Rockland County  
PIRC.vp.com

We received a request from the client to not disclose particulars about the residence and to honor that request I will not be issuing a formal report for this investigation on the website; however they did submit a comment on the types of things occurring in the residence. That is published here for your review.

Client's comment:

“Having spent almost half of my life residing in this house, I can personally attest to numerous paranormal phenomenon activities at this location. For example, there have been heavy chairs moved at least 5 feet overnight. We have experienced lamps going on and off, doors opening and closing, locks being locked from the inside, while we were not at home. We have often heard footsteps when no one is there. There have been items moved, only to show up in strange places later on. There have been overnight guest here that have refused to stay in one of our rooms, now used only as a closet, and yet others who have just plain refused to stay here at all. And of course, the captured EVP while testing a DR, which when asked was anyone here; the reply came “It’s me”.

We actually feel quite safe with our “extended spirit family.” Almost to the point that we feel protected. . It would be nice to have a feel of how many are with us and even a name or two.

I can't comment on any particular feelings that I would perhaps normally experience, as I feel that I have become quite used to any and all of the activity and have a tendency to shrug it off as our “other family”.

Given the amount of evidence and experiences collected and felt during the Investigation, I feel it warrants a return visit.

And for PIRC member J... That's a wrap; I think we got all we need!”
